

Warm-up 1

Take a matrix in $M_{3 \times 4}^{\mathbb{R}}$ that is in reduced row echelon form. How many pivots could it have? Give an example for each of your answers.

Warm-up 2

Describe in vector form the solution set to the following inhomogeneous system. (Note that the system is already in RREF.)

$$\begin{aligned}w - 2x + z &= 1 \\ y - 3z &= 5\end{aligned}$$
