

How to use WeBWorK for your computerized homework

To start, click on the WeBWorK link on our course Canvas page. You will see the following screen. Log in using the username and password that I sent you through a message on Canvas.

Site Information

Welcome to the [Runestone Academy](#) WeBWorK server.

Once you log in, you will find yourself at the screen below. The menu on the left will let you change your password (under User Settings) and see your computer homework grades (under “Grades”). To get started with your first problem set, click Homework 1. Future homeworks will appear on this screen as I release them to the class. You won’t need to click Courses in the left menu; that’s only used if you are taking more than one course that uses WeBWorK.

Homework Totals	40%	4	10										

Below is what a typical WeBWorK problem looks like. Fill in the answer blanks and hit “Submit Answers” to see if you are correct. If you want to “preview” your answer ahead before submitting it (in case it involves a complicated expression, which it usually won't), you can click “Preview My Answers”.

Your number of attempts remaining is listed below the problem. On problems where you are inputting a number, you will typically have 6 attempts. On multiple choice problems, you will usually have one or two fewer attempts than there are answer choices. You do not need to do the problems in order; you can move between problems either by clicking “Previous Problem” and “Next Problem” at the top, or by clicking on the problems in the menu on the left.

Homework 1: Problem 7

(1 point)

Evaluate the following matrix product.

$$\begin{bmatrix} 4 & -1 \\ 2 & 3 \end{bmatrix} \begin{bmatrix} -7 \\ 5 \end{bmatrix} = \begin{bmatrix} \text{ } \\ \text{ } \end{bmatrix}$$

If something weird is happening with a problem and you can't make sense of it, you can click "Email Instructor" below the problem and send me a short note about what's going on. I will reply and help you to resolve the issue as soon as I'm able to. You can of course always reach out to me by email or through Canvas.
